

(A) Data Construction

Official MoleculeACE data

SMILES

Activity y

Official
cliff label c

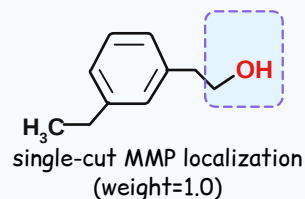

Split official training partition

Final training (90%)

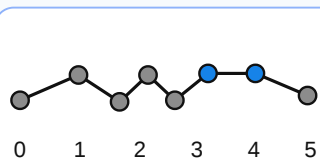

Validation (10%)

MMP search
for each official cliff molecule,
 $|\Delta y| > 1$; *similarity* ≥ 0.9 in at least one
of Morgan FP / scaffold FP / SMILES Levenshtein

MMP localization

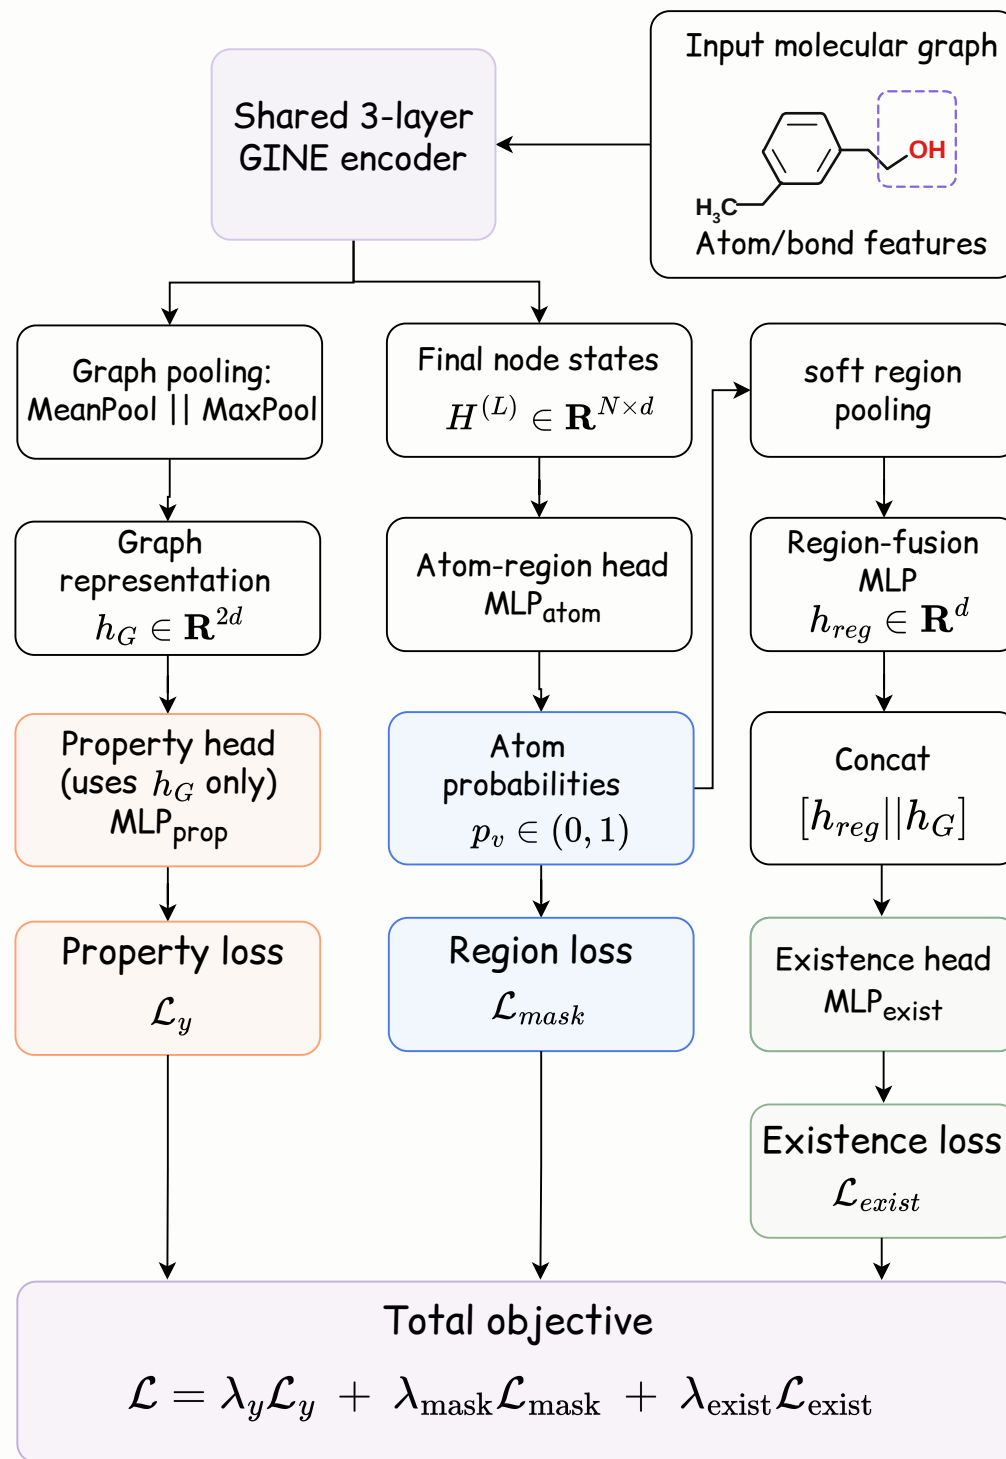

Example sample

smiles: "example"
 y : 7.42
cliff label : 1
atom_region_mask :
[0,0,0,1,1,0]

(B) Model Training

(C) Inference
